

Hand Sanitizer for Healthy Hand Hygiene

Our *misting* Hand Sanitizer for Healthy Hand Hygiene is formulated with 70% Isopropyl alcohol as its active ingredient, special emollients, and a fresh mint scent.

Our unique formula:

- ✓ Uses an Isopropyl alcohol base, which yields the broadest killing spectrum (99.9%)
- ✓ Has a very strong general effectiveness against the most common disease-causing germs (e.g., cold, flu, virus, fungi)
- ✓ Is highly effective and the preferred solution for clinical and medical applications
- ✓ Is safe for all ages and non-allergenic
- ✓ Contains special emollients that are engineered to "stay out of the way" of alcohol molecules during the killing phase, yet leaves the skin clean, soft, and moisturized.
- ✓ Applies with a mist, rather than a gel, for full coverage, including the cracks of skin
- ✓ Is perfect for the active traveler... spray it anywhere to instantly kill germs (e.g., airplanes, hotel rooms, shopping carts)

HealthProNutrient.com

Any virus, and especially the Swine Flu virus, is highly transmissible through coughing or sneezing.

80% of all germs that cause viruses are transferred by hand contact.

Touching something with a flu virus on it and then touching your mouth or nose may also cause infection.

We recommend to you what we're doing in our own homes. Protect yourself and others, just as we are.
