

JointWorkX™ is the premiere joint support product on the market. Designed to protect your joints against wear and tear from aging and athletic stress.

JointWorkX is a unique formula that provides long-term nutritional support for joint and overall connective tissue. Studies have validated that some of the key ingredients in this product enhance joint mobility.

Key Ingredients of JointWorkx:

Glucosamine HCl (vegetarian) - supports connective tissue and joint structure such as the cartilage. It can protect cartilage and is also beneficial for athletes experiencing connective tissue stress. It is involved in the formation of nails, tendons, skin, eyes, bones, ligaments and heart valves, a base membrane builder.

Chondroitin Sulfate - works best with Glucosamine and is known to promote healthy joint function. Chondroitin is a natural substance in the body that stimulates the production of key components found in cartilage. This glycosaminoglycan is important in maintaining the elasticity and integrity of connective tissue and the walls of blood vessels.

MSM - Methyl-sulfonyl-methane (MSM) is a naturally occurring substance known for its diverse health benefits, including support for healthy hair, skin, nails and joints.

Bromelain (2450 GDU) – an enzyme that helps with inflammation and promotes healthy digestion along with tissue repair function.

Hyaluronic Acid - helps maintain lubrication and support to joints.

White Willow Bark Extract - has anti-inflammatory and anti-pyretic actions without causing gastrointestinal toxicity. It helps restore proper joint function in connective tissue disorders.

Supplement Facts

Quantity: 120 Capsules

Serving Size: 1 capsule	Amt Per Serving	%Daily Value
Glucosamine HCl (vegetarian)	375mg	*
Chondroitin Sulfat (porcine)	125mg	*
MSM	60mg	*
