

For Cell Enhancement, Weight Management, Mitochondrial Support

LifeLine only uses pigments from plants naturally high in polyphenols and flavonoids. The polyphenols in blackberries have been shown to reverse mitochondrial damage.

### Key Ingredients of Lifeline:

**Mangosteen Extract** – Contains compounds that have antioxidant, anti-bacterial, and anti-fungal properties. The latest in scientific research shows Mangosteen contains a class of naturally occurring polyphenolic compounds known as Xanthones. Xanthones may provide beneficial effects on cardiovascular diseases, including ischemic heart disease, atherosclerosis, hypertension, and thrombosis. Mangosteen also shows vasorelaxant properties. The two most beneficial Xanthones found in Mangosteen have been named Alpha Mangostin and Gamma Mangostin. When isolated and thoroughly tested by researchers, these two Xanthones have been found to carry a host of benefits. According to professional journals such as Free Radical Research, Journal of Pharmacology, and the Indian Journal of Experimental Biology, these Xanthones have a significant effect on cardiovascular health and are among the most powerful antioxidants found in nature.

**Elderberry Extract** – A rich source of nutrients, especially bioflavonoids and anthocyanins. Anthocyanins are a unique class of bioflavonoids that give certain plants their colors. In the case of elderberries, anthocyanins are the pigments that give color to the elder plant’s black berries. They are powerful antioxidants that can protect our cells from free radical damage. Research has shown that anthocyanins in black elderberry boost the production of cytokines, the proteins that act as messengers within our immune system, and thereby serve to enhance the body’s immune response. The black elderberry contains nearly five times the level of anthocyanins (natural antioxidants) of the blueberry. The phytonutrients in elderberry positively influence cell function and protection in the human body. One of their primary benefits is helping maintain the walls of small blood vessels. Besides strengthening the body’s natural defenses, elderberry’s constituents influence many enzyme systems. Elderberry may inhibit the enzyme neuramidase, which can be harmful to the integrity of our cell membranes.

**Wolfberry Extract** – One of the most important traditional medicines in China. Wolfberry fruits have been used since ancient times in China as a general tonic to protect the liver, to improve vision, to strengthen weak legs, and to promote longevity. Wolfberries are the best source of carotenoids in known foods. Wolfberries contain a complete spectrum of antioxidant carotenoids (including beta-carotene, zeaxanthin, lutein, lycopene, and cryptocanthin) and numerous phenolic pigments (phenols) associated with antioxidant properties.

**Proprietary Blend of Green Tea Extract and Broccoli Extract** Broccoli extract contains sulforaphane, a substance that has anti-bacterial and anti-cancer properties. Sulforaphane is found in cruciferous vegetables and is a potent inducer of protective enzymes that provide defense against cancer-causing chemicals. Eating more broccoli and other cruciferous vegetables is associated with a lower risk of cancer.

Supplement Facts		
Quantity: 16 Fl. Oz. (480ml)		
Serving Size: 1oz	Amt Per Serving	%Daily Value
Ascorbic Acid	100mg	166%
Mangosteen Extract	250mg	*
Elderberry Extract	250mg	*
Wolfberry Extract	250mg	*
Blackberry Leaf and Fruit	250mg	*
Proprietary Blend of Green Tea Extract and Broccoli Extract	500mg	*
* Daily Value not established		

**Also Contains:** a base of aloe vera and purified water, calcium ascorbate, grape juice including skin and seed, lime.

**Directions For Use:** Take ½-1 ounce of LifeLine per day or as directed by your healthcare provider. Keep out of reach of children.

If you are pregnant or nursing, consult a physician before using this product.

This product contains NO egg, dairy, fish, peanuts, crustacean shellfish (lobster, crab, shrimp), soybeans, tree nuts, wheat (gluten), or yeast. Contains no artificial sweeteners, flavors, colors or preservatives. This product has not been evaluated by the FDA and is not intended to cure, treat, diagnose, or prevent disease.
