Liquid Chlorophyllin

What is Chlorophyll?

Green plants use carbon dioxide in the air, water and minerals from the soil and sunlight to produce food. This process is called “photosynthesis”. Sunlight is actually absorbed by the green substance found in leaves called “Chlorophyll”.

Promotes Cell Regeneration and Boosts the Immune System

Dr. Richard Willstatter and Dr. Hans Fisher have in 1915 and 1930 respectively received the Nobel Prize in medicine and Chemistry for discovering the molecular structure of human Red Blood cells and Chlorophyll. Due to this, Chlorophyll is shown to promote cell regeneration and reproduction as well as assist in building up the immune system.

Blood Production Property

Nobel Prize recipients, Dr. Richard Willstatter and Dr. Hans Fisher further discovered that the only difference between Red Blood Cells and Chlorophyll is that Chlorophyll has a magnesium atom in its nucleus while Red Blood Cells have iron. Thus, Chlorophyll can help in cases of anemia and other Blood deficiency conditions.

Cleanses Body of Pesticides and Drug Residue Toxins

Nutritionist Prof. Bernard Jensen pointed out that Chlorophyll is effective in reducing toxins caused by pesticides and drug residue by purging them from the body. He further observed that healthy people generally have higher blood counts compared to the sick. However, after high consumption of Chlorophyll, the sick showed an increase in blood count and improved health.

Liquid Chlorophyllin

Reduces the Body's Problems

Scientist Offen Krantz found that Chlorophyll is highly beneficial to patients with stomach ulcers. Chlorophyll complements the medication prescribed by doctors for stomach ulcers.
Improves Skin Problems, Beautifies Complexion

The New England Medical Journal reported that Chlorophyll can help in controlling skin problems and internal infection. The American Journal of Surgery published the findings by Temple University on the use of Chlorophyll to treat surgical wounds and other similar conditions.

Three Main Functions of Liquid Chlorophyllin

Cleansing, Balancing and Nourishing

Cleansing: Cleanses the digestive system, assists in purifying blood, eliminates bacteria, disinfects and detoxifies

Balancing: Balances body acid-alkali levels, boosts the functions of the body systems and helps balance hormone levels

Nourishing: Assists in red blood cell generation, enhances oxidation process and stimulates cell re-generation

Liquid Chlorophyllin is recommended because of its detoxifying, antioxidant and nourishing properties. It also deodorizes the body and reduces constipation and flatulence.

Recommended dose (adults); Mix 1 tablespoon of K-Liquid Chlorophyllin with 250 mL (1 cup) of water, and drink daily, or as directed by your health care practitioner. Shake well before use. Refrigerate after opening.

Medicinal Ingredient; Each 15 mL tablespoon contains 120 mg sodium copper chlorophyll (Chlorophyllin) from Medicago sativa (alfalfa) leaves.

Non medicinal Ingredients; Purified water, sorbic acid, sodium benzoate, sodium metabisulphite Contains no artificial colors, flavors or animal substances

Risk Information; Do not use if you are pregnant or breastfeeding. This product may cause diarrhea and/or discoloration of the feces, urine or tongue. Keep out of reach of children.
